(54) Clamp

(57) A clamp for securing an umbrella to a push chair handle comprises an umbrella stem holder 1 having at one end a handle clamp provided with opposed jaws 4 brought into clamping engagement with an interposed handle by a bolt and wing nut 5. The handle clamp is connected to the umbrella holder by an angle adjusting hinge 2 comprising serrated plates tightened together by a bolt and wing nut 3.

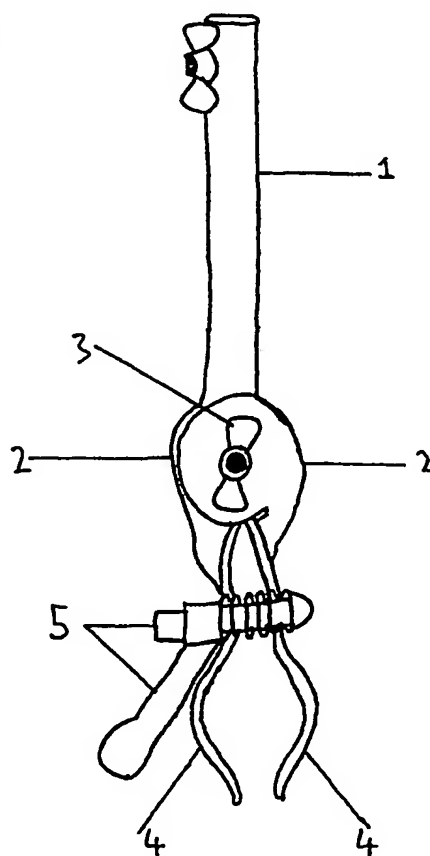

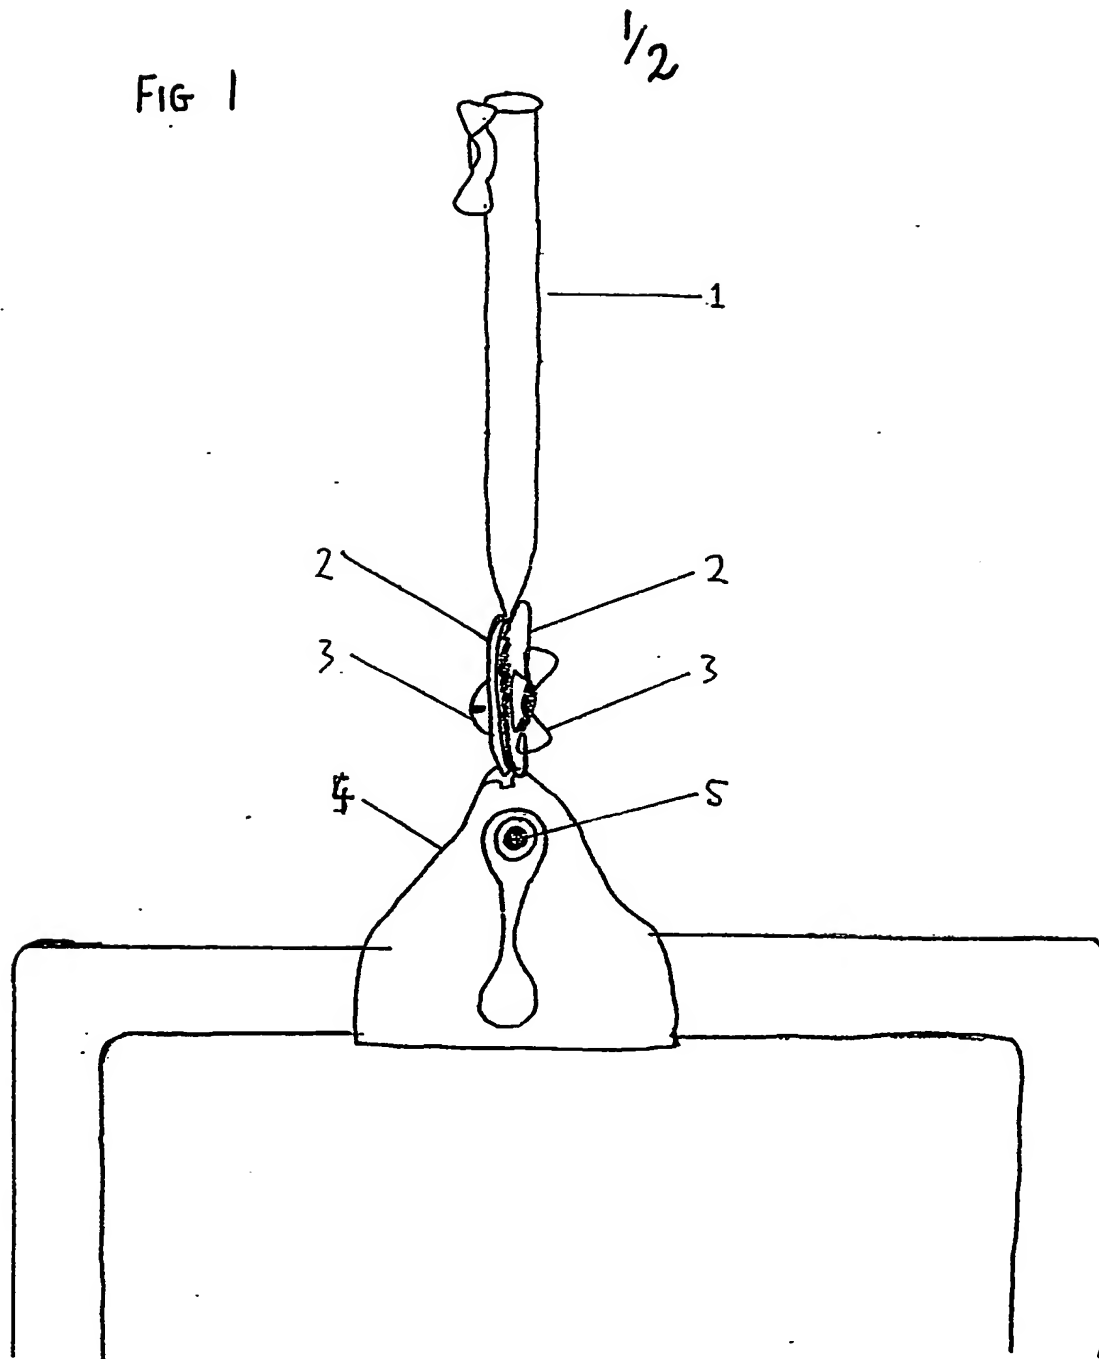

FIG 2

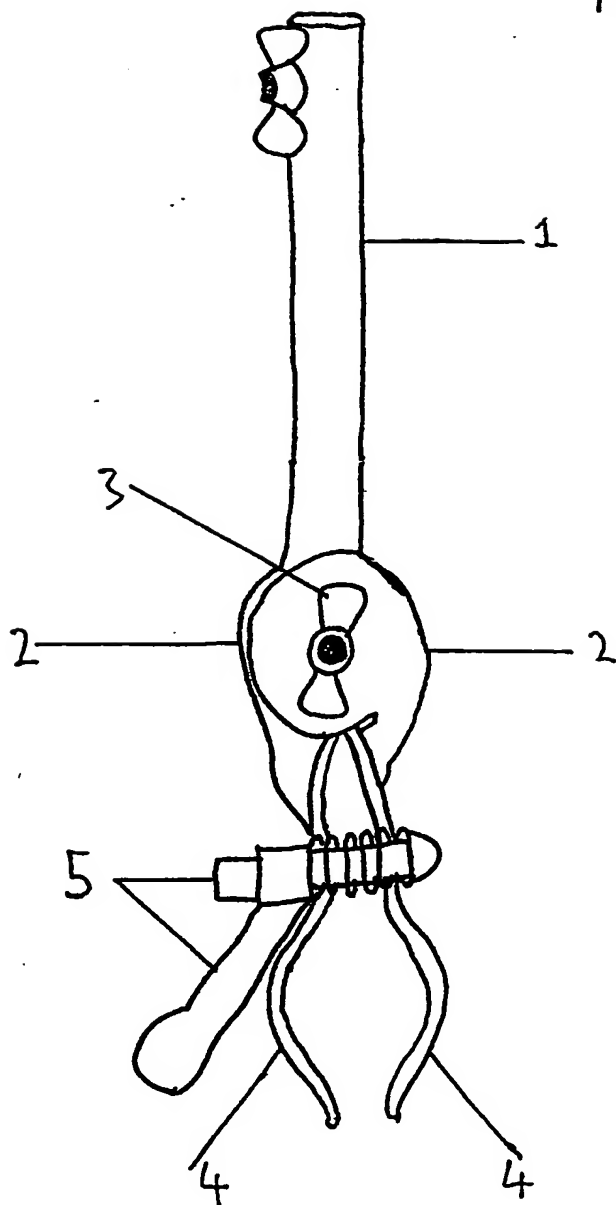

GB 2 277 955 A

FIG 1

2/2

FIG 2

ADJUSTABLE CLAMP WITH SUPPORT FOR HOLDING AN UMBRELLA TO A
PRAM OR PUSHCHAIR.

(Technical Field)

This invention relates to a clamp to attach an umbrella to a pram or pushchair.

(Background)

Prams and pushchairs are designed purely for the carriage and comfort of the child. Little consideration is given to the person pushing the pram.

(Example)

A specific embodiment of the invention will now be described by way of example with reference to the accompanying drawings in which

Figure 1. Shows in perspective the clamp attached to the pram handle.

Figure 2. Shows a side view of the clamp incorporating

- i) Umbrella stem holder with wing nut
- ii) Flanges can be flat or serrated
- iii) Bolt and wing nut to secure the flanges back and forth
- iv) Curved plates(padded) for pram handle
- v) Bolt with spring and lever type wing nut to tighten curved plates to pram handle

1. The clamp will be made of plastic, metal or a plurality of materials. It is designed to fit any pram or pushchair handle. It is also designed for the umbrella stem(1) to move up or down according to the person's height.
2. The umbrella can be moved back and forth by loosening wing nut (3) for the person's own comfort.
3. The clamp is easily removed for storage or it can be loosened by wing nut (3) and put in a convenient position.
4. It can be used for any type of umbrella or ideally of a clear plastic mushroom shape to protect the pram pusher and ensure all round vision.
